## RESUMO

A publicação dos resultados de investigação numa revista científica requer tempo e recursos, desde o processo de submissão até à publicação. Existem muitos obstáculos na publicação, sendo que alguns são inerentes ao processo em si, mas outros são criados justamente pela sociedade. O fenómeno das revistas predadoras surgiu há alguns anos, quando as revistas começaram a cobrar aos autores taxas de publicação – *article processing charges* (APC). O seu crescimento também foi facilitado pela transição das revistas impressas para as revistas eletrónicas, alterando o modelo de receitas das revistas impressas. Após o ano 2000 surgiram muitas revistas que asseguravam uma publicação rápida, taxas de aceitação elevadas e reduzidos APC aos autores. Pressionados pelo imperativo de publicar (*publish or perish*), este cenário atraiu os investigadores, alguns com recursos limitados para pagar os elevados APC das revistas mais respeitadas e reputadas. A falta de conhecimento e de sensibilização sobre as práticas predadoras de revistas pode comprometer os investigadores e o seu trabalho quando não leem atentamente o que assinam, não verificam a autenticidade do *website* da revista, esquecendo que, com o atual desenvolvimento tecnológico, é muito fácil simular uma imagem credível na Internet.

## CONTEXTO

- Publicar em revistas com revisão por pares pode ser gratificante – permite-nos compartilhar a nossa investigação com colegas e poder avançar na nossa carreira académica. No entanto, também pode ser difícil e frustrante. Os periódicos rejeitam, em média, **75% das submissões**, de acordo com um relatório da APA (American Psychologist , 2014). A revisão por pares pode levar meses e geralmente requer que os autores façam alterações significativas nos artigos antes da publicação.
- Então, imagine a alegria que os psicólogos podem sentir ao **receber um e-mail** de um periódico (com um nome muito semelhante a um respeitável periódico da APA) que os convida a enviar pessoalmente um artigo para uma próxima edição. A revista promete **revisão por pares numa semana** e publicação **em duas semanas**. Imagine ainda que a revista afirma ter um **alto fator de impacto**, em parte devido ao fato de seu conteúdo estar disponível gratuitamente em todo o mundo.
- Como diz o velho ditado: se parece bom demais para ser verdade, provavelmente é. Infelizmente, há uma grande probabilidade de que tal convite tenha sido enviado por uma "**editora predadora**". Embora esses editores inicialmente se concentrassem nas áreas das ciências biomédicas, um número crescente agora concentra-se na área da psicologia e ciências sociais.

## How to avoid predatory publishers

April 2016, Vol 47, No. 4  
Print version: page 43  
2 min read

APA staff have compiled the following list of questions to help researchers avoid publishing in predatory journals. When you receive an email inviting you to submit a manuscript to a scholarly journal, consider:

“

 **Is the email's tone overly informal?** Does it contain many exclamation points and typos? Is the

## OBJETIVO

Este webinar tem como objetivos esclarecer os participantes sobre o que são revistas predadoras, as suas características, o seu *modus operandi* e o seu impacto na comunidade científica.

Discutem-se ainda algumas recomendações de apoio aos investigadores para a identificação de revistas predadoras.

## ÉTICA DA PUBLICAÇÃO

A ética da publicação académica deve seguir códigos de conduta nacionais e internacionais; as publicações devem publicitar e cumprir as suas práticas de publicação de forma séria e transparente

## ÉTICA E INTEGRIDADE ACADÉMICA

- Fazer bem / agir adequadamente num contexto regulado por expectativas comuns, segundo as regras pré-estabelecidas e correspondendo a um conjunto de normas (nível instrumental)
- Não prejudicar ou desrespeitar outros, não obter vantagens indevidas, não quebrar a confiança de terceiros (nível comportamental)

# ÁREAS DE INCIDÊNCIA DOS PRINCIPAIS PROBLEMAS DE ÉTICA ACADÉMICA

**CENSORED**

- Alegações de má conduta
- Autorias e contribuições falsas ou enganosas
- Reclamações e recursos contra más práticas de revistas científicas
- Conflitos de interesse do investigador
- Dados e reprodutibilidade (incumprimentos dos princípios FAIR)
- Supervisão ética (orientação doutoral abusiva)
- Propriedade intelectual (registo indevido de patentes)
- Gestão de publicações periódicas (falta de independência, eficiência, credibilidade)
- Processos de revisão por pares (falta de transparência nos critérios)
- Discussões pós-publicação (correção, revisão ou retração de artigos após publicação)

# ESTRATÉGIAS DE RESPOSTA

## CONTEXTO

**Ciência Aberta** promove uma ciência mais acessível a todos. Para as publicações científicas significa permitir o acesso ao conhecimento científico de todos e para todos, promovendo eficiência, visibilidade e transparência. Os dados e resultados devem ser localizáveis, acessíveis, interoperáveis e reutilizáveis (princípios FAIR).

## INSTRUMENTO

**Literacia da Informação** promove a descoberta crítica e reflexiva da informação, o seu uso e aplicação de forma ética e legal, por exemplo, através da correta citação e referência, assentando na prática científica.

## COMPORTAMENTO

Cada **investigador** deve cumprir as normas da cientificidade académica, integrando um conjunto de valores científicos na sua investigação.

## Características das revistas

Editor (investigador sénior)

Conselho Editorial composto por investigadores experientes e especializados no âmbito da revista

Comissão/Comité científico

Verificação da submissão dos originais, avaliação prévia pelo Conselho Editorial antes do encaminhamento aos revisores

# MODELOS DE PUBLICAÇÃO DAS REVISTAS ACADÉMICAS E CIENTÍFICAS

## AUTOR

**Não paga** – Acesso Aberto - Via verde / ou modelo acesso aberto / ou acesso aberto com embargo durante um período de tempo

**Não paga** – Acesso restrito

**Paga APC** – Via dourada acesso aberto / prestígio

## LEITOR

**Modelo tradicional** (paga subscrição ou modelo híbrido em acesso aberto)

**Acesso aberto via verde** (free para o leitor)

**Via dourada em acesso aberto** (free para o leitor, autor paga APC)

**As REVISTAS PREDADORAS exploram o modelo da via dourada em acesso aberto**

## ACESSO ABERTO

The journal can  
request an **article  
publication charge.**

**OPEN ACCESS**

They get it  
online for **FREE.**

## Consequências da publicação em revistas predadoras

- Más práticas acadêmicas
- Plágio
- Ameaça à essência da investigação
- Contaminação de taxonomias
- Divulgação de teorias, alimentando a **pseudociência**
- Colocam em causa a **legitimidade** das disciplinas
- Colocam em causa o trabalho de investigadores, dos incautos e daqueles que publicam trabalhos legítimos
- Empresas podem usar estas revistas para publicar artigos com resultados falsos

# PROCESSO DE REVISÃO DE PARES

## As Revistas Predadoras

são entidades que priorizam o interesse próprio à custa de subsídios e caracterizam-se por informação falsa ou enganosa, desvio das melhores práticas editoriais e de publicação, falta de transparência, e/ou o uso de práticas agressivas e indiscriminadas de convite à apresentação de trabalhos

COMMENT • 11 DECEMBER 2019

## Predatory journals: no definition, no defence

Leading scholars and publishers from ten countries have agreed a definition of predatory publishing that can protect scholarship. It took 12 hours of discussion, 18 questions and 3 rounds to reach.

## Representação das revistas predadoras nas bases de dados

Dados de 15.02.2022 (autores)

## Características das revistas predadoras (1)

- Títulos das revistas similares ou muito próximos das revistas legítimas
- Uso de títulos estabelecidos, respeitados, atraentes e com impacto – Global, International, Universal, Asian, American, European...
- Trabalho desenvolvido por uma pessoa e um computador
- Âmbito de publicação não é claro ou é apresentado de forma vaga
- Grande variedade de temas e um âmbito multidisciplinar para atrair investigadores de todas as disciplinas
- Elevada taxa de aceitação de artigos
- Assumem um carácter internacional, mas publicam poucos artigos de autores conhecidos ou internacionais

## Características das revistas predadoras (2)

- Conselho editorial diminuto ou a anunciar brevemente: os nomes dos que o integram não correspondem a investigadores conhecidos; membros de diferentes países para dar à revista um aspeto internacional, mas sem informação sobre a designação e afiliação
- O *editor-in-chief* é também o *editor-in-chief* de muitas outras revistas de temáticas aproximadas ou do mesmo grupo editorial
- É requerida aos autores a transferência de direitos, apesar de advogarem o acesso aberto
- Garante-se a aceitação da publicação, um ciclo de revisão curto e rápido, um processo de publicação também rápido e fácil, com pouco ou nenhum controlo de qualidade, incluindo investigação falsa e artigos sem sentido

## Características das revistas predadoras (3)

- APC podem ser ocultados e exigirem pagamentos após a aceitação dos manuscritos
- Sinais de alerta dos *websites*: erros ortográficos e gramaticais
- Forma de contacto é um apartado postal
- Revistas geridas a partir de um *website* sofisticado com um visual e estética à imagem do das revistas indexadas de renome
- Endereços de *email* do gmail, yahoo.com ou algum outro fornecedor gratuito de *emails*
- Envio de *emails* de spam de forma massiva, campanhas intensas, repetitivas e agressivas para que os investigadores enviem manuscritos ou para que sejam incluídos nos conselhos editoriais
- Envio frequente de convites, por *email*, para recrutar interessados em proferir palestras ou para integrar conselhos de revisores em revistas

## Características das revistas predadoras (4)

- Envio de convites por *email* para a submissão de manuscritos para as próximas «edições especiais»
- São adicionados, sem o seu consentimento, nomes de investigadores reais aos conselhos editoriais para ganhar credibilidade
- Declarações enganosas ou falsas sobre um falso e elevado fator de impacto, como um Scientific Journal Impact Factor, Global Impact Factor, Journal Impact Factor ou um Universal Impact Factor
- Uso do ISSN para provar que se trata de uma revista de investigação
- Sem informação sobre a preservação digital dos artigos

## Características das revistas predadoras (5)

Assumem a indexação dos trabalhos em bases de dados de renome, como PubMed, MEDLINE, DIRECTORY OF OPEN ACCESS JOURNALS (DOAJ) ou Web of Science, imitando o logotipo e aplicando-o no seu *website*

Colocação fraudulenta do logotipo do COMMITTEE ON PUBLICATION ETHICS (COPE) na *homepage* do *website*

Quando a sua verdadeira natureza é descoberta, algumas revistas recusam-se a retirar os artigos a pedido do autor, cobrando uma taxa pela sua remoção

Fornecem locais de publicação falsos que afirmam estar localizados em Londres, quando na verdade estão localizados no sul da Ásia

## WELCOME TO IJARSET!

International Journal of Advanced Research in Science, Engineering and Technology (IJARSET) is an open access, international, peer-reviewed, monthly journal, dedicated to serve the society by quality research work. The journal aims at promoting innovative research in various disciplines of Science, Engineering and Technology. IJARSET invites authors to submit original and unpublished work in terms of written reviews, short communications and notes dealing with numerous disciplines that communicates current research.

**Frequency : 12 Issues per Year**

**Subject Category : Science, Engineering and Technology**

#### Call for Papers

On behalf of the [Advances in Applied Sociology \(AASOCI, ISSN Online: 2165-4336\)](#), a peer-reviewed open-access journal, I am honored to invite you to write papers for the upcoming special issue on "Social impact of COVID-19". In light of your renowned research and your contribution in the field, we would like to formally invite you to submit papers to us. Papers reporting original research or extended versions of already published conference/journal papers are all welcome.

Submit your paper or Inquire: reply to our original message ( [Manuscript@openaccessj.com](#)) (E-mail Subject Format: AASOCI\_article title). If you are interested, we would be pleased to hear from you and will respond within one working day.

Detailed information about published articles, indexing, editorial board members can be checked at this journal website by searching [AASOCI 2165-4336](#) online.

#### Aims & Scope (not limited to):

Dear Author/Researcher,

We are pleased to inform you that IOSR-JDMS is going to launch its next issue (March 2021). We would like to invite you to contribute your Research Paper for publication in IOSR-JDMS.  
The Journal publishes papers of the highest scientific merit and widest possible scope work in all areas related to medical and dental science.

The Journal welcomes review articles, leading medical, dental and clinical research articles and case reports.

Publication frequency: 12 issues per year IOSR-JDMS follows the rapid publication process IOSR JDMS is indexed in Indian Citation Index (ICI) as per MCI guidelines.

Indexing: Crossref, NASA ads, DOAJ, Index Copernicus, Open-J Gate etc.

Dear Sir,

We are happy to announce to you that the International Organization of Scientific Research Journals have come under AQCI - 2021 Top 10 Journals Ranking. It was calculated on the basis of "Google Scholar Citation" of published articles.

IOJR Journals got 9th Ranking by AQCI (African Quality Center for Journals) - Top 20 Journals Ranking.

IOJR Journals Indexing: Index Copernicus, Cross Ref (USA), NASA ads, AINED (American national Engineering Database), Google Scholar, Open- J Gate.

IOJR Journals provides DOI (Digital Object Identifier) to each article. IOJR Journals DOI is 10.9790.

Papers are invited for IOJR Journals MARCH 2021 Issue related to all fields of Engineering, Technology, VLSI, Science and Mathematics, Chemistry, Physics, Applied Sciences, etc.

IOJR Journals have following different open access Journals:

IOJR Journal of Engineering : 6.645 <<https://daynyte.com/mv/index.php/campaigns/pv973v7jgo722/track-url/zs5987hlg1ffa/5f14dcf3507d6569816b72e3927c7d5374437311>>

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

Other index

MIAR collects data for the identification and the analysis of scientific journals. If you enter an ISSN in the search box, the system will check in which [databases](#), those referred to in the matrix, the journal is indexed. That is regardless of whether the journal is included with a full description in MIAR or not. The system will also calculates an index called the [ICDS](#). If the journal is not included in MIAR, the value of the Survival Index will not be given.

MIAR is a COLLABORATIVE tool. [Publishers](#), [authors](#) and [readers](#) can suggest new journals, report errors, supply news, or share data on social networks.

MIAR has an INTEGRATED approach. Apart from showing the visibility of journals in abstracting and indexing databases, MIAR also provides information about journals from other evaluation tools, such as the Sello de Calidad FECYT, Scimago Journal Rank, or CARHUS+, as well as their open access policies as represented by the [ROME](#)O colour.

MIAR is a TRANSPARENT and UP-TO-DATE resource. Information is always processed using data available from public sources. It can be also directly compared with the original source material. At the end of each quarter (during the last days of March, June, September and December) journal coverage lists are reviewed in order to keep the system updated with the latest additions. The algorithm for ICDS is public and is displayed in each record for each journal.

48332 journals

116 databases

7 evaluation resources

# Publicações da base de dados PsycINFO (APA)

<https://www.apa.org/pubs/databases/psycinfo/coverage#>

The screenshot shows the APA PsycInfo Journal Coverage List page. At the top is the American Psychological Association logo and navigation links: MEMBERS, TOPICS, PUBLICATIONS & DATABASES, SCIENCE, EDUCATION & CAREER, and NEWS & ADVOCACY. A search bar is in the top right. Below the navigation is a breadcrumb trail: Home // Publications & Databases // Databases & Electronic Resources // APA PsycInfo // APA PsycInfo Journal Coverage List. A secondary navigation bar includes links for Books, Children's Books, Databases, Digital Learning, Journals, Magazine, Reports, Videos, and APA Style. The main heading is "APA PsycInfo® Journal Coverage List" with a subtitle "December 2021 Update". The text states that 2,290 journals are currently covered and that the list is updated online as journals are added or discontinued. Two links are provided: "Download the journal coverage list in Excel format (290KB)" and "View journal coverage policy". A section titled "Other information" directs users to the "Journals Added to Coverage List" page. On the right, there is a sidebar for "APA Databases®" with a search bar and a link to "MORE ABOUT APA PSYCNET". A footer link says "More About APA PsycInfo".

## APA PsycInfo® Journal Coverage List

### December 2021 Update

Currently, there are 2,290 journals covered in APA PsycInfo.

The list changes continuously as journals are added and discontinued throughout the year, so it is updated online regularly.

- Download the journal coverage list in Excel format (290KB)
- View journal coverage policy

### Other information

Visit the [Journals Added to Coverage List](#) page to see a list of the journals we've added to the Journal Coverage List since the last update.

About

Languages

**Think. Check. Submit.** helps researchers identify trusted journals and publishers for their research. Through a range of tools and practical resources, this international, cross-sector initiative aims to educate researchers, promote integrity, and build trust in credible research and publications.

Sharing research results with the world is key to the progress of your discipline and career but with so many publications, how can you be sure you can trust a particular journal? Follow this checklist to make sure you choose trusted journals and publishers for your research.

Ajuda os investigadores a identificar revistas de confiança para a sua investigação; fornece uma lista de verificação e perguntas.

<https://vimeo.com/151882443>

# THINK CHECK SUBMIT

<https://thinkchecksubmit.org/>

## 1. Pensar

- Está a submeter a sua investigação a uma revista reputada?
- Esta é a revista certa para publicar o seu trabalho?

## 2. Verificar

- Tu e os teus colegas estão familiarizados com a revista?
- Já leu algum artigo desta revista antes - é fácil encontrar os últimos artigos da revista?
- Pode facilmente identificar e contactar a editora? O nome da editora está claramente indicado no *website* da revista, pode contactar a editora por telefone, *email* e correio?
- A revista é clara quanto ao tipo de revisão por pares que utiliza?
- Os artigos estão indexados em recursos tais como Web of Science ou Scopus?
- Reconhece os membros do conselho editorial?
- Já ouviu falar dos membros do conselho editorial?
- Os membros do conselho editorial mencionam a revista nas suas páginas pessoais na Internet?
- Pertencem ao Comité de Ética da Publicação (COPE)?
- Estão listados no Diretório de Revistas de Acesso Aberto (DOAJ)?

## 3. Submeter ou Participar

- Se a resposta à maioria das perguntas desta lista de verificação for "sim" aceite.

- [The Advance Journals of Engineering Mathematics and Computer Sciences \(AJEMCS\)](#)
- [Advance Research Journal of Multidisciplinary Discoveries](#)
- [The Advanced Science Journal](#)

### Original description

This is a list of questionable, scholarly open-access standalone journals. For journals published by a publisher, please look for the publisher on the list of publishers, [here](#). This list is only for single, standalone journals.

We recommend that scholars read the available reviews, assessments and descriptions provided here, and then decide for themselves whether they want to submit articles, serve as editors or on editorial boards. In a few cases, non-open access journals whose practices match those of predatory journals have been added to the list. The criteria for determining predatory journals are [here](#).

We hope that tenure and promotion committees can also decide for themselves how importantly or how

Search for hijacked journals (name or URL)

### Hijacked Journals

This is a list of hijacked journals created by a librarian [Jeffrey Beall](#). Any updates to the list will be posted below it.

Sometimes someone will create a counterfeit website that pretends to be the website of a legitimate scholarly journal. The website creators then solicit manuscript submissions for the hijacked version of the journal, pocketing the money. In some cases, the legitimate versions of the journals are only published in print form and they may not have websites.

In the table below, the hijacker is listed in the left column; the corresponding authentic version of the journal is on the right. In cases where no website can be found for the original journal, a link is made to a bibliographic record for the journal.

| Hijacker/Predatory Journal                                    | Authentic Journal                                                              |
|---------------------------------------------------------------|--------------------------------------------------------------------------------|

## ANÁLISE DO IMPACTO

- Universal Impact Factor
- Science Impact Factor
- Global Impact Factor
- International Scientific Indexing
- SCIJournal
- Indian Citation Index
- African Quality Center for Journals

## Algumas recomendações para os investigadores (1)

- Título da publicação e possibilidade da sua manipulação artística
- Identificação do *editor-in-chief* e do conselho editorial (+ afiliação profissional e credenciais académicas adequadas ao âmbito de publicação da revista)
- O *editor-in-chief* assegura a mesma função noutras revistas do mesmo grupo editorial?
- Identificação de instruções e diretrizes detalhadas aos autores
- Âmbito de publicação claro e objetivo
- Política e prática editoriais claras e objetivas
- Taxa de aceitação de artigos (verificar datas de submissão e aprovação dos artigos já publicados)
- Internacionalidade dos autores (verificar a afiliação nos artigos já publicados)

## Algumas recomendações para os investigadores (2)

- Oferta de descontos ou a isenção de pagamento de APC para investigadores em início de carreira ou para autores provenientes de países com baixos recursos financeiros e/ou em vias de desenvolvimento
- Fator de impacto legítimo (verificar os *rankings* das revistas científicas)
- Evidência da preservação digital dos conteúdos publicados
- Análise do *website*: publicidade, erros ortográficos e gramaticais, contactos reais (não apartados postais), imagens com baixa definição (uso não autorizado), construção muito próxima à de outras revistas da mesma especialidade, etc.
- Verificar se a revista ou a editora é membro da OPEN ACCESS SCHOLARLY PUBLISHERS ASSOCIATION (OASPA), do COMMITTEE ON PUBLICATION ETHICS (COPE) ou dos SCIENTIFIC, TECHNICAL AND MEDICAL PUBLISHERS (STM)

## Guidance Case

COPE Members bring specific (anonymised) publication ethics issues to the COPE Forum for discussion and advice. The advice from the COPE Forum meetings is specific to the particular case under consideration and may not necessarily be applicable to similar cases either past or future. The advice is given by the Forum participants (COPE Council and COPE Members from across all regions and disciplines).

COPE Members may [submit a case](#) for consideration.

### Suspicious responses to authorship change requests

2021

A journal received a request for multiple changes to the authorship list after the manuscript was accepted. Originally, there were five co-authors. After acceptance, the journal received the following requests from author A, the corresponding author and co-first author: remove one of the co-authors (author D), add a new co-author (author E), reorder the list of authors, and change the designate...

- ✓ [Authorship and contributorship](#)

## Algumas recomendações para os investigadores (3)

- A revista integra o DIRECTORY OF OPEN ACCESS JOURNALS (DOAJ)?
- A revista integra o ULRICH'S PERIODICALS DIRECTORY?
- Apresentação destacada do ISSN
- Os artigos estão indexados nas grandes bases de dados internacionais (e.g., MEDLINE/PubMed, Scopus, Web of Science)?
- Uso do link THINK CHECK SUBMIT (<https://thinkchecksubmit.org/>) enquanto estratégia de validação
- Uso da ferramenta criada pela biblioteca da Loyola Marymount University ([https://digitalcommons.lmu.edu/librarian\\_pubs/40/](https://digitalcommons.lmu.edu/librarian_pubs/40/)) e que compreende 16 critérios de avaliação de revistas

# EDITORAS PREDADORAS

- Editoras predadoras usam práticas enganosas para atrair os autores a publicarem
- Exploram o modelo de negócios autor-pagador de acesso aberto para seu próprio lucro e realizam pouca ou nenhuma revisão por pares ou trabalho de edição
- Editores desconhecidos devem ser avaliados cuidadosamente antes de enviar um trabalho
- Recursos: as listas de verificação e recursos aqui divulgados ou pedir a opinião dos colegas
- O bibliotecário também pode aconselhar
