

*Open Science training  
methods and practices across  
European Research Libraries*

Cécile SWIATEK  
(former) LIBER Working Group on Digital Skills  
for library staff and researchers

2020 - Tuesday Nov. 26th

In a rapidly changing digital world, libraries are regularly re-assessing existing services and offering new ones to support research evolutions.

LIBER's Digital Skills for Library Staff and Researchers Working Group sketched the existing digital skilling and training practices available for library staff and researchers, with particular regard to those focused on Open Science.

Our aim was to share the many approaches being used across Europe — from mature programmes to emerging initiatives — through case studies.

By identifying and learning about the most relevant Open Science training programmes and initiatives in the current academic landscape, we can share best practices with our community.

# Digital Skills WG

Which new skills are needed by library professionals?  
What training is required in order to better support research activities?

## Skilling and training at LIBER

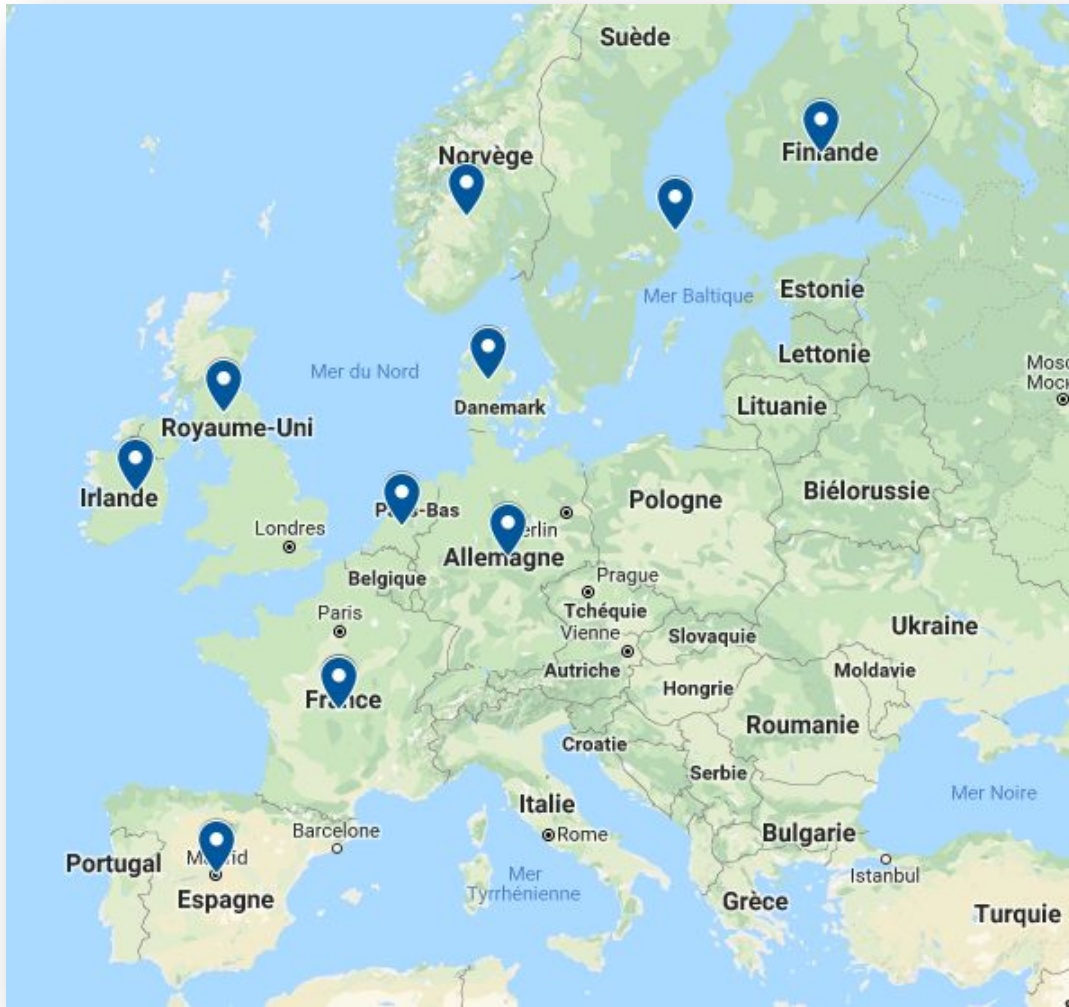

The WG participated to LIBER educational programme connected to digital skills of library staff members and researchers

## We delivered

Webinars  
Workshops  
OpenScience skilling and training selective landscape  
Digital Skills List : an Entry Point to Digital skills frameworks

## 15 members

# Case Studies on European Open Science Skilling and Training Initiatives

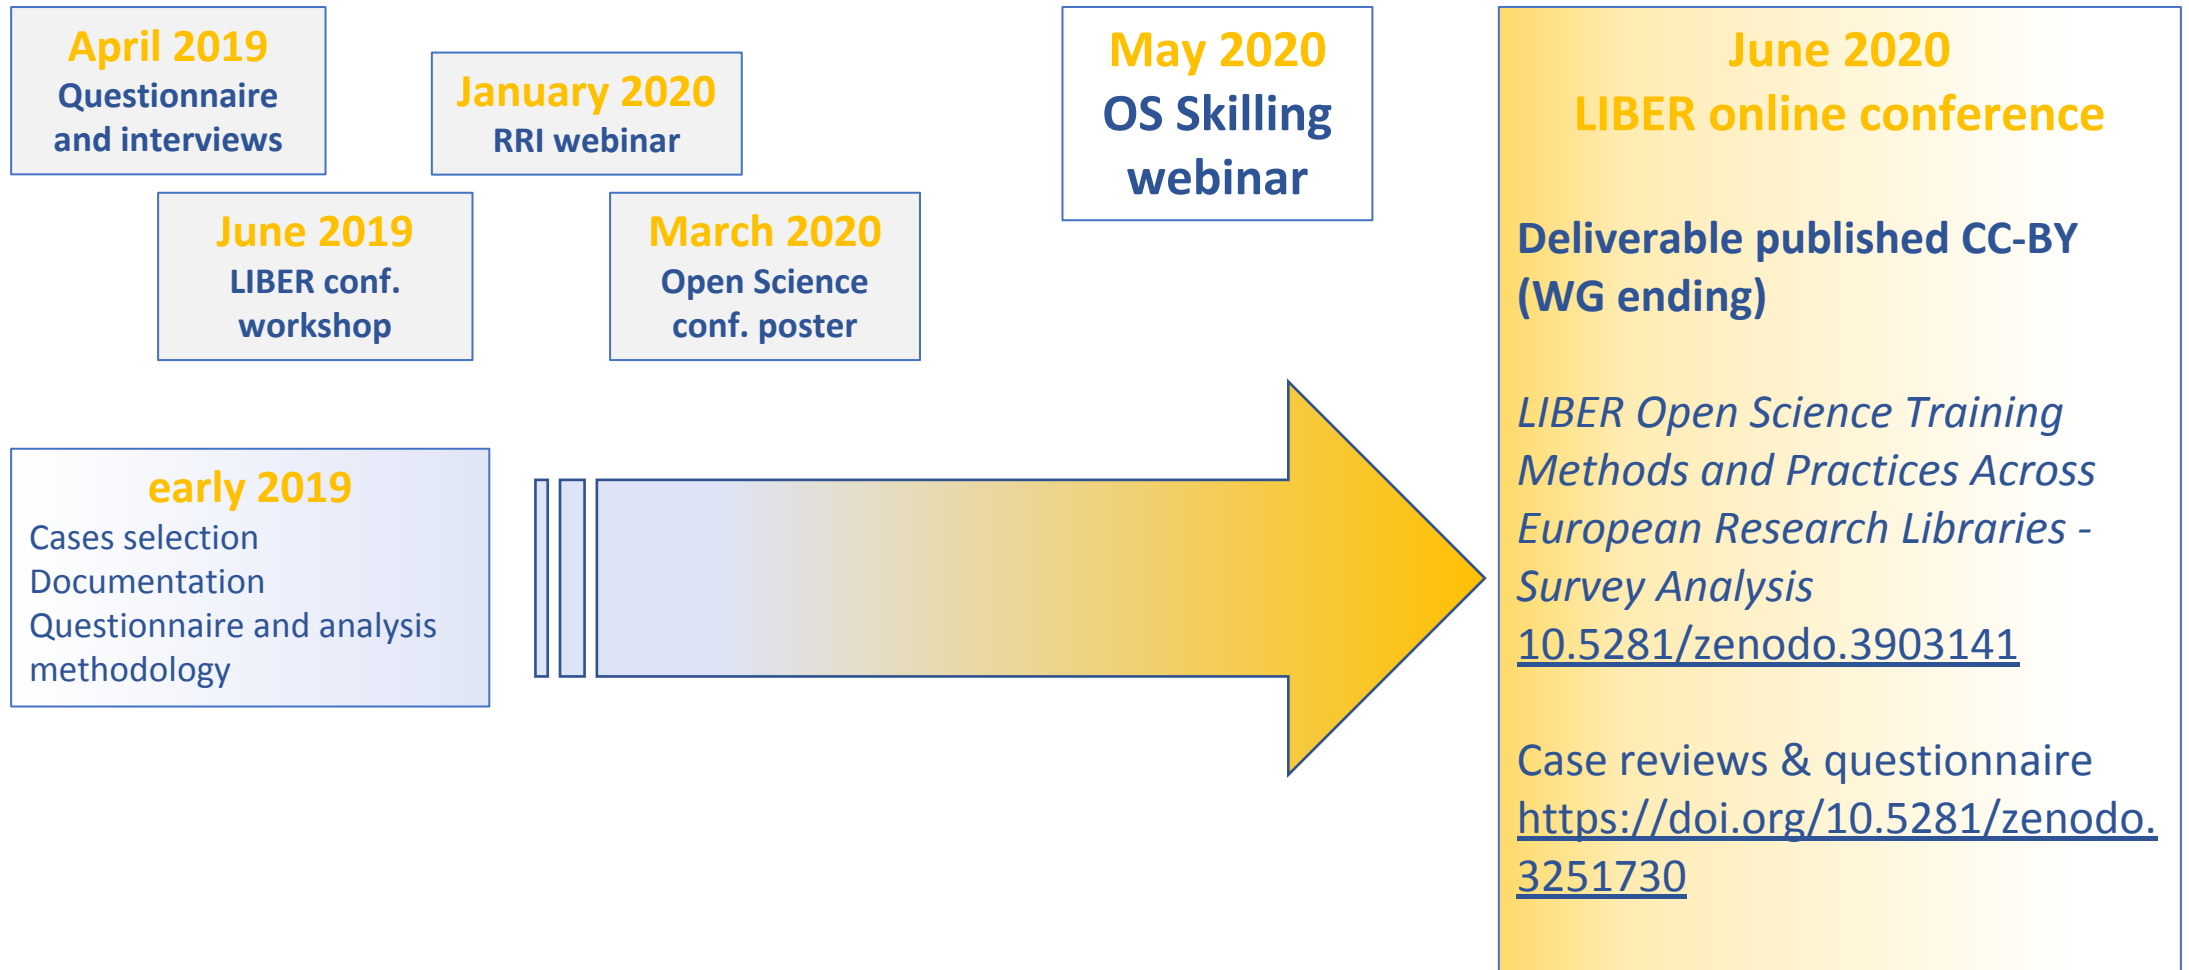

The advance of Open Science has meant a reinvention of models, ways of working and techniques.

How do European libraries engage in skilling and training library staff and researchers in order to establish and share new skills, and to support research activities more efficiently?

- Sharing the many existing approaches for building Open Science skills sets with library staff and researchers across Europe through case studies
- Identifying and learning about the most relevant Open Science training programmes and initiatives in the current academic landscape, and share best practices with our community

## Topics and priorities

The topic, goal and level of training activities is quite varied. Many training efforts focus on Open Science skills in general, while topics such as scholarly publishing skills and FAIR data are also popular. Each respondent was able to provide several choices.

Top priority

Strong priority

Moderate priority

Not a priority

Excluded

The lowest priorities are generally linked to the training calendar and a progressive skilling programme (Citizen Science, ethics). Some other skills are excluded when handled by other services than the library (data visualisation) or because of the lack of specialised trainers in the country.

Partnerships with external instructors and networks such as Carpentries, FOSTER Plus, EOSC skills or SSHOC Open Marketplace, help widen the scope. Citizen Science skills training for example benefits from co-organised workshops or from participating in local or European projects.

Some cases divide the skilling programmes between basic / advanced / expert levels. "Basic" skills for all staff implies that all library staff and research support staff will be trained in at least the most common aspects of Openness knowledge and culture. This becomes harder with training all newcomers in the research field, but early-career researchers are trained mostly through the PhD training – delivered by or with the library staff training services in all cases. Training newcomers is, however, sometimes achieved and training is conducted systematically at some institutions.

Swiatek, Cécile, McCaffrey, Ciara, Meyer, Thorsten, Svenbro, Anna, Brinken, Helene, Egerton, Frank, ... Clavel, Karin. (2020).

- Discipline-specific skills needed to practice open science (does not include generic computer skills, wider librarianship skills and personal competencies)  
 - Mapped to LIBER OS Roadmap 7 focus areas, Digcomp 2.0 framework and FOSTER training resources  
 - Produced by the LIBER Working Group on Digital Skills for Library Staff & Researchers with input from other LIBER Working Groups, 2020

# LIBER Open science skills

Skills list... started on a spreadsheet.

Three classes of skills:

- Discipline specific knowledge (DSK)
- Generic skills (GS)
- Personal competencies (PC)

Two skills levels:

1. Awareness & broad understanding
2. Indepth knowlege

Type : DSK, GS, PC	Skills Level 1: awareness & broad understanding	Skills Level 2: indepth knowledge	For Library Staff	For Researchers
DSK	<i>Scholarly communication / Open Access Publishing</i>		✓	✓
DSK		OA policies - institutional/funder/national	✓	✓
DSK		Development and management of current research information systems	✓	
DSK		Institutional repositories	✓	✓
DSK		e-research methods	✓	✓
DSK		Knowledge on Open Publication options (green, gold, hybrid)	✓	✓
DSK		New open publication strategies (contracts, relations with publishers, new funding models	✓	✓
DSK		Licensing, Copyright and Intellectual property in the digital environment	✓	✓
DSK		Bibliometrics and research impact reporting	✓	✓
DSK		OA Advocacy	✓

# LIBER Open science skills

## Focus on Open science skills

Type	Dimension 1: Competence Area Dig. Comp. 2.0	Area	Map to OS roadmap	Competence
DSK	1. Information and data literacy	Research data management	FAIR data	Storing & saving research data
DSK	3. Digital content creation	Research data management	FAIR data	Metadata for digital collections & datasets
DSK	3. Digital content creation	Research data management	FAIR data	Data publishing
DSK	1. Information and data literacy		FAIR data	Data analysis & visualization
DSK	1. Information and data literacy		FAIR data	Management of big data sets
DSK	1. Information and data literacy		FAIR data	Reproducibility of data
DSK	1. Information and data literacy		FAIR data	Data mining/text mining
DSK	3. Digital content creation		FAIR data	Data Management Planning
DSK	3. Digital content creation		FAIR data	FAIR data
DSK	1. Information and data literacy		FAIR data	Searching open data sources
DSK	1. Information and data literacy		FAIR data	Cleaning data
DSK	3. Digital content creation		FAIR data	Knowledge of data processing software
DSK	3. Digital content creation	Research assessment	Metrics & rewards	Bibliometrics, altmetrics and research impact reporting
DSK	2. Communication and collaboration	Communication	Metrics & rewards	Communicating research output via social media
DSK	3. Digital content creation	Open Access policies	Scholarly publishing	Knowledge of OA policies - institutional/funder/national
DSK	3. Digital content creation	Open Access	Open access skills	OA Advocacy
DSK	3. Digital content creation	Open Access infrastructures	Scholarly publishing	Knowledge on existing repositories
DSK	4. Safety	IPR	Research integrity	Copyright and Intellectual property in the digital environment
DSK	1. Information and data literacy		Research integrity	Research integrity and ethics skills, GDPR
DSK	1. Information and data literacy	Research assessment	Scholarly publishing	Development and management of current research information systems
DSK	3. Digital content creation	Open Access infrastructures	Scholarly publishing	Institutional repositories
DSK	3. Digital content creation	Open Access	Open access skills	Knowledge on Open Publication options (green, gold, hybrid)
DSK	3. Digital content creation	Open Access	Scholarly publishing	New open publication strategies (contracts, relations with publishers, new funding models)
DSK	4. Safety	IPR	Scholarly publishing	Licensing in the digital environment
DSK	3. Digital content creation	Open Access publishing	Scholarly publishing	OA University Presses
DSK	3. Digital content creation	Open Access	Scholarly publishing	Negotiating with publishers for OA - Pay to read/Pay to publish
