The power of citizen science

Citizen science is the involvement of the public in scientific research – whether community-driven research or global investigations. The Citizen Science Association unites expertise from educators, scientists, data managers, and others to power citizen science. Join us, and help speed innovation by sharing insights across disciplines.

Tag Along with Adler

ABOUT CLASSIFY TALK COLLECT

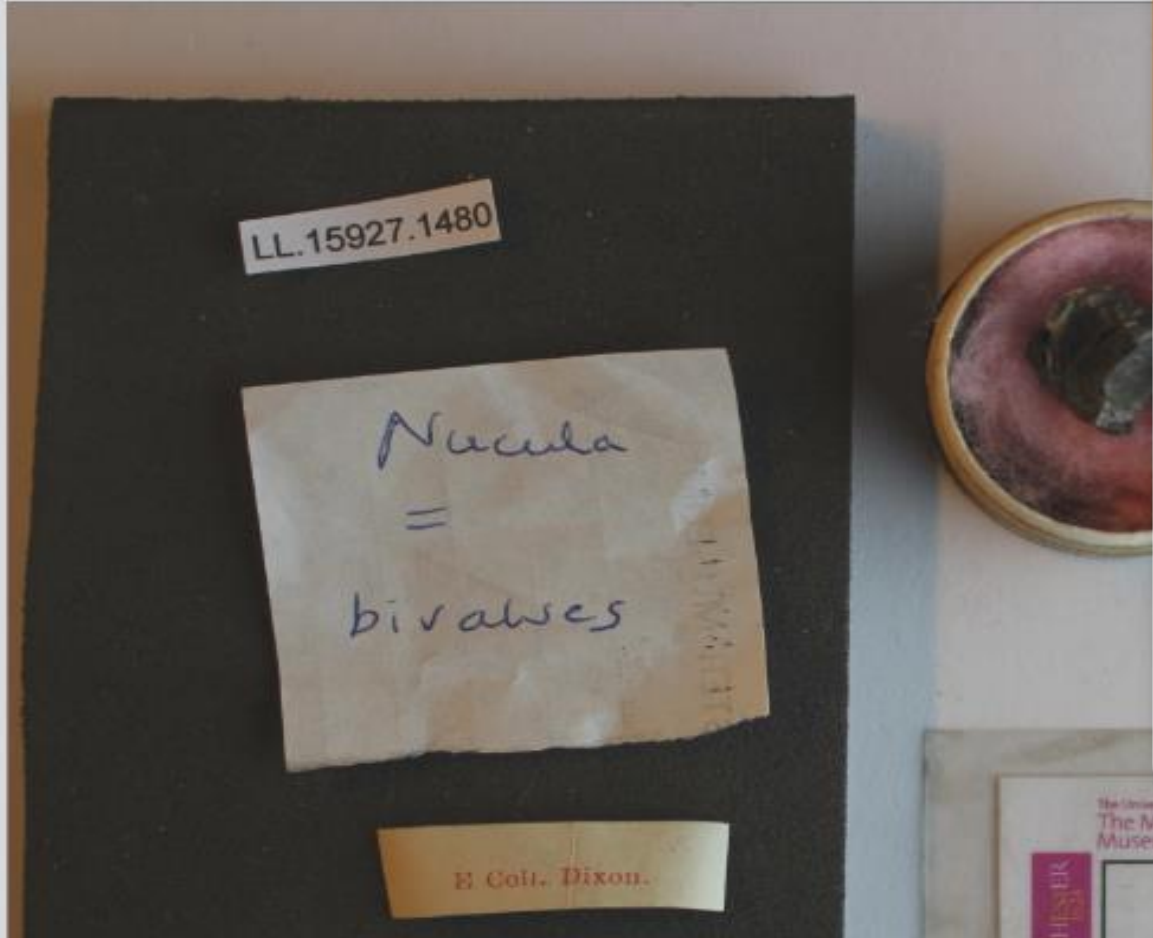

Update 16th of April, 2021 The third subject sets for both workflows are now complete! The fourth subject sets for the "Tag Images" and "Verify AI Tags" workflows are now updated! Please join in on both! Help the Adler know who participated in "Tag Along with Adler," and how your experience was! Fill out the survey here: <https://forms.gle/JZ3fuZhKdvahe5dm7>

Help the Adler Planetarium tag our
collections to expand how we
catalogue our objects, and how our
users can find them!

Welcome to the transfers workflow!

We're really glad that you want to help us with our [#everynamecounts](#) project!

In this workflow, we would like to ask you to enter information about the **admission, transfer, and release** of prisoners from concentration camps.

In order to trace their complex paths of persecution, it is very important for us to know the *dates* and *places* of their imprisonment. All other data such as *name* and *dates of birth* can be entered in other workflows (search for one of our **BASIC** or **GEO** workflows).

In order to ensure that we can process the results without any problems, we have prepared some useful tips for you on how to enter the data. Please read them carefully!

Many thanks!

NEED SOME HELP WITH THIS TASK?

Identify fish species on paintings, to gain information on biodiversity and commercial use of fish species

Fishing in the Past is a really cool project for science and art lovers alike that is easy enough for anyone to do. It's essentially a virtual art museum that shares paintings from [rijksmuseum](#) and [rkd](#) that feature at least one fish. The artwork is painted by Dutch painters (some of whom are famous) from 1500 until 1700. Then, according to the website, you can “identify fish species on paintings, to gain information on biodiversity and commercial use of fish species.” It's a window to the past that allows us to shape the future stories we tell and you can start [HERE](#).

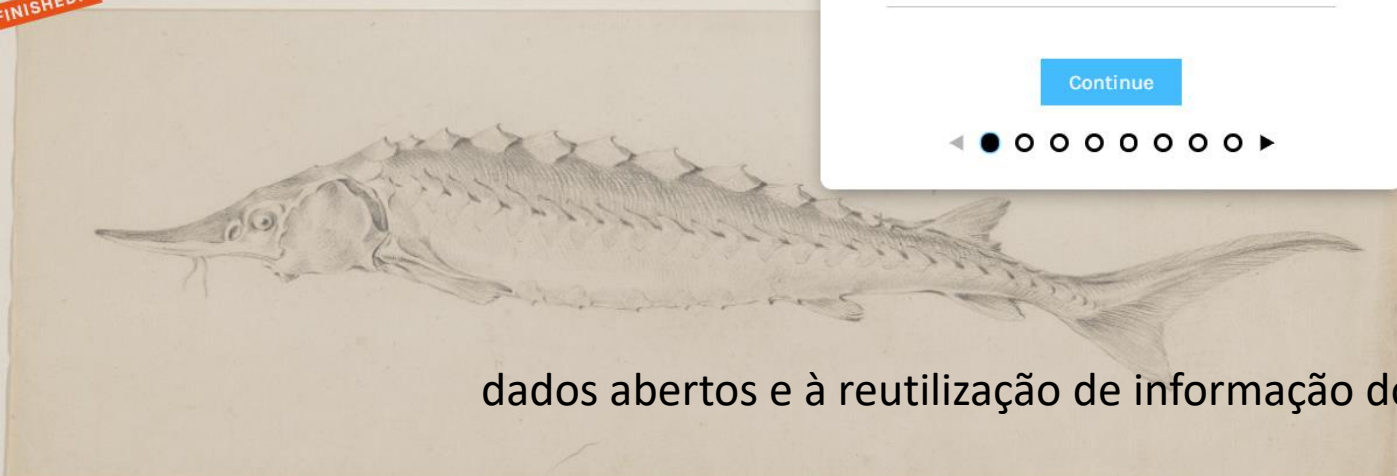

The classifications of the largest set of artworks (previously the English set) is near...
Great work

Welcome to *Fishing in the past*. In this project, we need your help in order to know which species of fish were painted by artists from the 16th to 19th century. You will see a picture from our selection of 2300 pieces of art involving fish. With the help of a filter, you can find out which fish species are pictured.
